Report of Street Committee.

Ann Arbor, Mich., Sept. 4, 1903.

To the Common Council.

Gentlemen—Your Committee would respectfully recommend that Kingsley street be properly graded from State to Ingalls streets and that the gutters be so constructed that the water will not run from the gutters into the street, and that the Board of Public Works be requested to attend to this work at once.

Your Committee further recommends that the Toledo & Ann Arbor Railroad be allowed to change their tracks between William street and Hill street as per profile and that the same be granted and put on record.

Your Committee recommends that the successors of the Ann Arbor Street Railway be ordered to place a heavier rail, not less than 7-inch tram rail, on their city line from corner of Main and William streets to Packard street, and from Main street on Packard to Wells street, at once, to overcome the heavy jar and pounding on these streets from the cars.

As to the matter of finding a suitable place for public drays in this city, which was referred to the Street Committee, we would recommend that one hundred feet on the south end of the city property, corner of Huron and Fifth avenue, be cleaned up and properly graded and that the same be used for public drays in place of having them standing on our street corners; and that the grounds shall be used by the draymen under the di-

rection of the Board of Public Works until such a time as the city makes other use of the same.

Your Committee further recommends that West Huron street from First street to the Forks, and Jackson avenue from the Forks to the city limits, be properly graded and graveled to restore the street into as good a condition as it was before the franchise was granted to Hawks & Angus for their electric railway.

All of which is respectfully recommended.
