Engineer's Department, Ann Arbor,

Michigan, Feb. 19, 1915.

To the Honorable Common Council, Ann Arbor Michigan Sir:-I present herewith report of gauging wells at the Steere farm. The first readings were taken on Feb. 15, 1915, before baling the sand out of the wells. The second readings were taken the following day after the sand had been baled estimate the cost of this work to be out from the inside of the casing of about \$40.00. I would recommend wells No. 1 to No. 5. This baling out that you authorize me to have this of the sand was not the cleaning pro- fence repair and construction done. posed by Alderman Groves, inasmuch Mr. Lewis agrees that during the as it only removed the sand from the proposed construction and pumping

inside of the well casing and did not in any way effect the sand cloggage of the gravel stratum outside of the well casing. The baling out of this sand cost in the neighborhood of fifteen to twenty dollars, while the cleaning of the gravel stratum around the wells would cost \$125.00. The reason for cleaning out the sand inside the well casing was to free these casings from cloggage in order that the elevation to which the water will rise should not be effected by this cloggage at the time of pumping the 16-foot well, when we expect to make observations on all the surrounding wella.
