

Council Chamber, Ann Arbor, Mich.,
Nov. 6, 1916. Regular session.

Meeting called to order by the President. Present: Ald Fiegel, Heusel, Lutz, Mayer, Heck, Andres, Flynn, Donnelly, Sherk, Freeman, Sink, Geo. Lutz, Pres. Wurster, 13. Absent. Ald. Manwaring, McGregor, 2. Minutes of previous meeting approved.

From the Board of Public Works.

Plat of Killins Heights addition to the City of Ann Arbor was presented.

Moved by Mr. Cornwell, that plat be approved by the Board of Public Works. Adopted by board.

(Council action)—

Plat was presented to Council, and on motion of Ald. Fiegel, accepted by the following vote: Yeas, Ald. Fiegel, Heusel, Lutz, Mayer, Heck, Andres, Flynn, Donnelly, Sherk, Freeman, Sink, Geo. Lutz, 12. Nays, none.

President not voting on any questions.

Plat of Killins-Stuhrberg first addition to city of Ann Arbor was presented.

Moved by Ald. Fiegel that plat be accepted.

Adopted by the following vote: Yeas, Ald. Fiegel, Heusel, Lutz, Mayer, Heck, Andres, Flynn, Donnelly, Sherk, Freeman, Sink, Geo. Lutz, 12. Nays, none.

(From Board of Public Works)—

By Mr. Cornwell—Resolved, that the title to plat, accepted by the board, Sept. 13, 1916, as the Eber White Second addition, be changed and known as the Eber White First addition, as the same has been returned by the Auditor General for said correction. Adopted by board.

(Council action)—

Moved by Ald. Fiegel, that action of board be concurred in.

Adopted by the following vote: Yeas, Ald. Fiegel, Heusel, Lutz, Mayer, Heck, Andres, Flynn, Donnelly, Sherk, Freeman, Sink, Geo. Lutz, 12. Nays, none.

Report of Sidewalks Built By City.

Ann Arbor, Mich., Oct. 4, 1916.

To the Common Council from the Board of Public Works: Gentlemen—We submit to your honorable body the report of all sidewalks built by this board, and charged to the property owners, as per your order. The amount placed after each description being the actual cost of the walk, with ten per cent added, this being the amount which is a lien upon the property, as per section 13 of an ordinance relatives to sidewalks

Sidewalks built by city, cost of same and ten per cent added to be assessed against the property along which said walks have been constructed.

By Ald. Heck—Resolved, that the report of the Board of Public Works be accepted.

Resolved, further, that the Common Council sit as a board of review to review the report and certificate of the Board of Public Works this day filed, said board of review to meet in the Common Council chamber, the twentieth day of November, 1916, at 7 o'clock p. m.

Resolved, further, that the clerk give notice of said meeting of the board of review, according to the ordinance governing the same.

Adopted by the following vote: Yeas, A'd. Fiegel, Heusel, Lutz, Mayer, Heck, Andres, Flynn, Donnelly,

Sherk, Freeman, Sink, Geo. Lutz, 12. Nays, none.

Communications.

Ann Arbor, Mich., Oct. 24, 1916.

To the Honorable Common Council of the City of Ann Arbor, Mich.: Gentlemen—This department submits for your recommendation the increase in salary of Mr. Herbert Emerson, chemist, from \$30.00 per month to \$50.00 per month. The State Board of Health as well as the Health survey wish daily tests of the city water, hence this increase is asked. Increase in salary to take effect Oct. 1, 1916.

Very truly your, Water Works Dept. of the City of Ann Arbor, Geo. S. Vandawarker, Mgr.

Moved by Ald. Geo. Lutz, that the recommendation of the Water Works Dept. be accepted and adopted.

Adopted by the following vote: Yeas, A'd. Fiegel, Heusel, Lutz, Mayer, Heck, Andres, Flynn, Donnelly, Sherk, Freeman, Sink, Geo. Lutz, 12. Nays, none.

Claims for damages alleged to be caused by stoppage of sewer were received from C. F. Pardon and Mrs. Clara R. Pillsbury, and were referred to the Sewer committee and City Attorney.

Petitions.

Petition of Fred T. Stowe, et al, to continue the storm water sewer from Olivia ave. across Packard st., received and referred to Sewer committee.

Petition of F. C. Weinberg for sanitary sewer on Fifth ave., from main sewer north to 50 ft. south of the north line Weinburg's sub-division, and thence east to east line of Fifth ave., received and referred to Sewer committee.

Petition of R. S. Perrine, et al, for crosswalk on south side of Vaughn st., across E. University ave., received and referred to Street committee.

Finance Committee.

Ann Arbor, Mich., Nov. 6, 1916.

To the Finance Committee of the Common Council: Gentlemen—I have examined the foregoing accounts against the city of Ann Arbor, and I hereby certify that they are correct to the best of my knowledge.

ISAAC G. REYNOLDS, City Clerk.

To the Honorable, the Common Council: Gentlemen—Your Finance Committee has

reviewed the foregoing report. Warrants for salaries were drawn Nov. 1, 1916. We recommend that same be approved and that warrants be ordered drawn for the foregoing accounts.

GEO. LUTZ, ALBERT FIEGEL, Finance Committee.

Ald. Geo. Lutz moved the adoption of the report, which was adopted by the following vote: Yeas, Ald. Fiegel, Heusel, Lutz, Mayer, Heck, Andres, Flynn, Donnelly, Sherk, Freeman, Sink, Geo. Lutz, 12. Nays, none.

Engineer's Estimates.

Ald. Geo. Lutz presented the following estimates from the City Engineer, and moved that the amounts now due be allowed, and the City Clerk ordered to draw warrants for same:

Second estimate Sewer Dist. No. 78, Wm. Eddy & Son, contractors, amount now due. \$443.90

First estimate Sewer Dist. No. 79, Wm. Eddy & Son, contractors, amount now due \$572.89 |

Second estimate to Sewer Dist. No. 73, Hochrein & Co., contractors, amount now due. \$1 091.09

First estimate Sewer Dist. No. 80, Hochrein & Co., contractors, amount now due \$243.00 |

Fourth estimate Pavement Dist. No. 36, Barnes & O'Neill, contractors, amount now due \$8,761.50 |

City of Ann Arbor, Mich., Nov. 1, 1916.

To the Honorable Common Council, Ann Arbor, Mich.: Sirs—I present the following final estimate for the grading of Edward st., and recommend payment of the amount now due, to Messrs. Herrst & Markey, the contractors:

4,368 cu. yds. excavation,
at 44 1-2c \$1,943.76 |

Less amount previously paid 1,749.38

Amount now due contractors \$ 194.38

Respectfully submitted, Manley Os-good, City Engineer.

Adopted by the following vote: Yeas, Ald. Fiegel, Heusel, Lutz, Mayer, Heck, Andres, Flynn, Donnelly, Sherk, Freeman, Sink, Geo. Lutz, 12. Nays, none.

By Ald. Geo. Lutz—Resolved, that the inspectors of each ward, if they deem it necessary, be allowed to have one or two extra clerks for the election to be held Nov. 7, 1916.

Adopted by the following vote: Yeas, Ald. Fiegel, Heusel, Lutz, Mayer, Heck, Andres, Flynn, Donnelly, Sherk, Freeman, Sink, Geo. Lutz, 12. Nays, none.

Ordinance Committee.

To the Honorable, the Common Council: Gentlemen—Your Ordinance committee, to whom the following matter was referred, respectfully report that we had the same under consideration and recommend the adoption of the following resolution:

Whereas, there are two open stairways in the sidewalk leading to the basement on the east side of the Al-lene hotel, and the owners of the hotel proposed to close both the said stairways on condition that they be allowed to construct an elevator, extending into the sidewalk not more than five ft. from the building line, leading to the basement, in the sidewalk, on the east side of the building, the same to have self-closing doors, therefore.

Resolved, that the Council will interpose no objection to building such elevator; provided, that it is constructed under the supervision of the City Engineer, and that both said stairways be closed.

Respectfully submitted, C. A. Sink,
Albert Lutz, Ordinance Committee.

Adopted by the following vote:
Yeas, A. d. Fiegel, Heusel, Lutz, Mayer, Heck, Andres, Flynn, Donnelly, Sherk, Freeman, Sink, Geo. Lutz, 12.
Nays, none.

A. d. Sink presented the following ordinance, which was given its first reading:

The Common Council of the City of Ann Arbor Ordain:

Section I. Subject to all the terms and conditions mentioned in this ordinance, consent and permission is hereby given to the Washtenaw Gas Company, a corporation organized under the laws of the State of Michigan, and to its successors and assigns, to lay, maintain, operate and use gas pipes, mains, conductors and service pipes, in the streets, alleys, highways and public places in the City of Ann Arbor, for the purpose of supplying and selling gas for all purposes, to the said city and inhabitants, thereof, and for conducting gas to supply neighboring cities and villages.

Section II. Said Company shall supply gas at the rates herein specified, to all applicants not in arrears for prior bills, owing or occupying premises on streets in which gas mains or conductors are laid, and where said Company has not laid mains or conductors, said Company shall lay

mains within thirty (30) days in streets upon the petition of two applicants who are owners or occupants of buildings, provided the buildings on said streets average two buildings in every two hundred feet of the main pipe required to supply the same, if directed so to do by the Common council, said Company may require a reasonable deposit from consumers when in its judgment it is necessary.

Section III. The said company shall do no injury to any street, avenue, alley, lane, park or public square, nor to any shade trees, nor in any manner disturb or interfere with any electric conduits, or with any water, gas or other pipes, nor with any public or private sewer, now or hereafter laid or constructed by any authorized person or corporation, and shall fully indemnify and save harmless the City of Ann Arbor from any and all claims for damages which said City might be made or become liable for to pay by reason of the construction, making, laying or operating of said pipes, mains, conductors or service pipes, or the giving or allowing of the license, right and privilege hereby granted. Said Company shall replace all pavements and streets through which pipes are laid, to the satisfaction of the Board of Public works of said city.

Section IV. The main pipes of this Company to be hereafter laid shall be placed in that part of the streets, alleys, or public places, as shall be designated by the Common Council or its duly authorized agent.

Section V. Said company shall not charge nor receive any higher rate than the following for gas furnished through one meter to any consumer within the City limits:.

For the first one thousand feet used in any one month through one meter, \$1.25 per thousand feet; for the next four thousand feet used in any one month through one meter, \$1.10 per thousand; for the next five thousand feet so used, \$1.05 per thousand; for the next 40 thousand feet so used, \$1.00 per thousand; where over fifty thousand feet of gas per month is used, \$1.00 per thousand for all gas consumed.

All the above subject to a discount of twenty-five (25) cents per thousand feet if payment is made on or before the 10th day of the month following that in which gas is consumed. If

less than five hundred feet of gas is used in one month a minimum charge of fifty cents (50c) may be made.

Section VI. All service pipes shall be maintained by said Company to the lot line of the consumer, Said Company shall be entitled to charge for furnishing and laying service pipes from the lot line to the meter at the cost thereof.

Section VII. Gas furnished under this franchise shall have an average calorific value of Five hundred seventy-five (575) gross British Thermal Units and a minimum calorific value of Five hundred twenty-five (525) gross British Thermal Units.

Section VIII. The City of Ann Arbor may, when it desires, appoint a gas inspector, whose duty it shall be to inspect the quality of gas from time to time, and determine whether its quality is that required by this Ordinance. It shall also be his duty to inspect and test meters used by the Company, and he may require said company to remove any such meters to be tested and deliver the same to him. Said inspector may perform such other service as the City of Ann Arbor may require, and which is not in any manner inconsistent with the provisions of this Ordinance.

Section IX. Should the State of Michigan enact a law creating a Public Utility Commission having proper jurisdiction, the regulatory powers of this Ordinance shall be subject to such and to the rules of said Commission at the instance of the Council or the Gas Company.

Section X. This ordinance shall continue and remain in force for the period of thirty year from and after the date of its passage.

Section XI. The said Washtenaw Gas Company shall, within five days after the approval of this Ordinance, file in the office of the City Clerk, its assent to and written acceptance of the conditions and provisions of this Ordinance. The filing thereof shall be held as the undertaking of said Company to be governed by, observe and carry out in good faith, each and every one of the provisions, terms and conditions of this Ordinance contained and prescribed.

Section XII. The City of Ann Arbor shall, at any time after ten years, have the right to purchase all of the

Works, apparatus, mains, pipes, meters, supplies and other property, and the business of said company its successors and assigns then existing, as an entirety, at a valuation and upon terms and conditions which shall be fixed by a Board of Arbitration to be constituted as hereinafter stated,—Provided, that said city shall give to said Company, its successors and assigns, one year's notice, in writing, of its intention to make such purchase, and at the expiration of said year, shall proceed with and complete such arbitration. Said Board of Arbitration shall be appointed as follows: One member by the Washtenaw Gas Company, or its successors or assigns; one member by the Mayor, confirmed by the Common council of the City of Ann Arbor; and one member to be elected by the two thus appointed. If said two members shall be unable to agree upon the third member of said Board, then said third member shall be appointed by the Public Utility Commission of the State of Michigan, if one exists, or if not, by the Michigan Securities Commission. In case either party shall neglect or refuse to appoint the third member of said Board of Arbitration, said third member shall be appointed on its own behalf by said Public Utility Commission of the State of Michigan, if one exists, or if not, by the Michigan Securities Commission. In arriving at a fair price at which said purchase shall be made by said City, the said Board of Arbitration shall not take into consideration the value of this franchise or grant, but shall allow a fair value for the property actually used by said Company in its business, and shall take into consideration as an element of value, the earning capacity of said property and its business as then established and existing. The price, terms of sale and terms of payment agreed upon by said Board of Arbitration, or a majority of the members thereof, shall constitute the basis of said sale and both the City of Ann Arbor and the Washtenaw Gas Company shall be bound to abide thereby. The members of said Board so to be appointed shall be men versed in the appraisal of property of this character.

Section XIII. This ordinance shall be of no force or effect what ever unless it is accepted by said Washtenaw Gas Company within the

time and in the manner above provided.

Section XIV. Within ninety days after the passage of this Ordinance and its acceptance by the Washtenaw Gas Company, it shall be the duty of the Common Council to submit this ordinance to the qualified electors in the City of Ann Arbor for approval, in accordance with Section 25 of Article VIII of the Constitution of the State of Michigan.

Made and passed in Common Council, this _____ day of _____ A. D. 1916. Approved _____, 1916.

Mayor

Attest:

City Clerk

Moved by Ald. Sink, that the ordinance be printed in the minutes and referred to Ordinance committee.

Adopted by the following vote: Yeas, Ald. Fiegel, Heusel, Lutz, Mayer, Heck, Andres, Flynn, Donnelly, Sherk, Freeman, Sink, Geo. Lutz, 12. Nays, none.

Street Committee.

To the Honorable Common Council, Ann Arbor, Mich.: Sirs—Yours Street committee have had the following matters under consideration and recommend:

(1) That at once upon receipt of deeds from Mr. L. J. Hoover, conveying the necessary property for connecting Philip and Edwin sts., the Board of Public Works do cause the buildings thereon to be moved off and the street, from Division st. to Fourth ave., to be properly graded and a sidewalk to be constructed along the north side thereof, from said Division st. to Fourth ave. Also that the City Attorney, upon receipt of said deeds, do notify the Ann Arbor Railroad Co. to remove their buildings from within the lines of this st., and construct a proper crossing over their tracks at this point.

(2) That crosswalks be built across Washington st., on the east side of Ninth st., and across Ninth st., on the north side of Washington st.

Respectfully submitted, Albert Fiegel, Albert Lutz, C. T. Donnelly, C. A. Sink, Street Committee.

Ald. Fiegel moved adoption of the report, which was adopted by the following vote: Yeas, Ald. Fiegel, Heusel, Lutz, Mayer, Heck, Andres, Flynn, Donnelly, Sherk, Freeman, Sink, Geo. Lutz, 12. Nays, none.

Ald Fiegel presented the following communication.

Ann Arbor, Mich., Nov. 6, 1916.

To the Common Council, City of Ann Arbor: Gentlemen—We have several thousand yards of good gravel in the Michigan Union cellar, which we will deliver on Granger ave. for one dollar (\$1.00) per cubic yard.
Respectfully yours, C. J. Snyder & Sons.

Moved by Ald. Fiegel, that the Street Commissioner be authorized to purchase such amount of gravel, referred to in communication, at a price not to exceed one dollar per cubic yard, as he deems necessary.

Adopted by the following vote: Yeas, Ald. Fiegel, Heusel, Lutz, Mayer, Heck, Andres, Flynn, Donnelly, Sherk, Sink, Geo. Lutz, 11. Nays Ald. Freeman, 1.

Special Committee on Flag.

To the Honorable, the Common Council: Gentlemen—Your committee on the flag matter begs to report as follows:

That inasmuch as the flag, as well as the cable from which it was suspended, are not the property of the city, and as the city is in no way responsible for their existence, your committee recommends.

That the request of Mr. Oldring in his communication to this Council, to defray maintenance expenses, be refused.

Respectfully submitted, O. Mayer.

Frank Heck, Special Committee on Flag.

Ald. Mayer moved the adoption of report which was adopted by the following vote: Yeas, Ald. Fiegel, Heusel, Lutz, Mayer, Heck, Andres, Flynn, Donnelly, Sherk, Freeman, Sink, Geo. Lutz, 12. Nays, none.

Respectfully submitted: MANLEY OSGOOD, City Engineer.

Ann Arbor., Michigan, October 28, 1916.

To the Board of Public Works, and the Honorable Common Council, Ann Arbor, Michigan: Sirs—Acting in conformance with verbal report of October 16, 1916, I wish to submit the following more detailed report of the meeting of the American Society of Municipal Improvements, held in Newark, to which you saw fit to send me.

On Monday, October 9th, the time was spent in meeting of the various committees which formulated specifications for various kinds of sewers and pavements which were afterward presented to the whole Society and adopted with any changes which it saw fit to make. Recommended specifications are published by this society for wooden block pavement, brick paving, bituminous paving, asphalt paving, concrete paving, stone

block paving, broken stone and gravel roads, and for sewers.

The principal topics of the next day were City Management and Water Supply. In connection with the latter subject the members were taken on a trip to one of the reservoirs of the Newark water supply, and in the evening of the same day an illustrated description of the entire Newark waterworks system was given. They have, for a number of years, had a water supply similar to those which New York City, Los Angeles, and San Francisco have been obtaining during the past few years. They acquired all of the land in a certain drainage area above the intake pipes and have nearly cleared it of habitations. They have constructed in this drainage area three reservoirs which control the rate of run-off and by means of which they can impound the water at high times and draw on this storage supply during low water conditions. From these three reservoirs the water is carried through pipe lines and open channels to a fourth reservoir nearer the City which furnishes gravity pressure to all parts of the City of Newark. Tuesday was finished by a lecture, illustrated by moving pictures, on the great Columbia Highway, which is the most notable and most wonderful highway work in the country today.

On Wednesday there were several very interesting topics. First was the problem of collection and disposal of garbage. The most important discussion centered on the disposal of garbage from large cities. There was however, some discussion of disposal of refuse from smaller cities, and it was practically conceded that incineration was the only feasible method. Collection now is mainly done by means of motor driven trucks.

A very interesting paper was submitted by Mr. E. W. Stern, the Chief Engineer in charge of highways of the Borough of Manhattan, in which he showed the damage done to some of the very finest pavements that could be constructed by an exceedingly heavy load moving at a considerable rate of speed. From this he drew conclusions as to the limiting of loads and speed of traffic on paved streets.

The afternoon was taken up with a discussion of sewage disposal and centered mainly about the Activated

Sludge Process which is the newest process and gives promise of being the most remarkable and perhaps the universal method to be used in the near future. Men who are really pioneers in this work gave papers and entered into the discussion. It was a remarkable session and for a municipality which is confronted with problems which face the city of Ann Arbor, was alone worth the cost of the trip.

On Thursday, the specifications which were prepared by the various committees on paving, sewers, etc., were presented to the Society and adopted, after which a boat trip was given by the City of Newark to all the members and guests starting from Newark municipal docks, going up the Hudson on one side of Manhattan, then back and up the East River on the other side, passing the Brooklyn Navy Yards and other points of interest.

The Friday morning session was taken up with the discussion of street lighting, from which it was easy to conclude that the present method of street lighting by arc lamps on street corners will undoubtedly be replaced by a method which gives a more even distribution of light throughout the entire length of the street.

In conclusion, I wish to thank you for sending me to the convention and assure you again that the information which I obtained will be a considerable profit and benefit to the City of Ann Arbor from time to time as the various problems which will confront the City at early dates arise.

Respectfully submitted, Manley Osgood, City Engineer.

Health Officer's Report.

Ann Arbor Michigan, Nov. 6th, 1916

To the Honorable Common Council: Gentlemen—At a recent meeting of your honorable body an appropriation of \$1000.00 was made to meet the expense of a Health Survey of the City of Ann Arbor, with instructions to your Health Officer to conduct such survey. Pursuant to such order I have the honor to report as follows:

Outline of the Work Reported.

The Health Survey of Ann Arbor has comprised an investigation and study of the several factors which have direct or indirect bearing on the health of this community. Since the

affairs of our city are so closely interrelated with the affairs of our neighboring communities a betterment of health conditions in Ann Arbor will also operate indirectly to raise the general health tone of our whole state.

Undoubtedly the most important factor in the health of any community is the public water supply. It directly affects the health of all the people and experience has shown us the benefits to be derived from a pure supply both in reduced death rates from water-borne diseases and the improved reputation in public health matters which the city acquires from a pure supply.

It was not thought necessary to review the water situation because the people are sufficiently informed about it and the work toward obtaining either of the two proposed supplies must necessarily wait on the action of the court. We have fortunately escaped so far any serious outbreaks of water-borne disease but we should not rest any longer than is necessary on this past record in view of the danger surrounding our present source of supply.

High in importance among the factors relating to public health are our own milk supplies. Our unfortunate experience this past summer has emphasized this point. Attention has been given to a comprehensive inspection of the dairy farms with the view of preventing future trouble of this same kind.

Included in the activities of the survey has been an inspection of the many food establishments, the restaurants and boarding houses, the hotels, the groceries and meat markets, the bakeries and the confectionaries. Good wholesome food is necessary for the development of strong bodies while food establishments might become sources of infection of contagious diseases unless proper precautions are taken to guard against this.

Living as we do within confined areas in close proximity to several neighbors many of our acts directly affect these neighbors and accordingly we are governed by city ordinances which operate for the good of the whole community. Because of these facts the special inspectors have made inspections of all premises with view of locating privy vaults, cess-pools, barns where animals are

kept and enclosures for fowls or domesticated animals. Privy vaults with their accumulation of human excrement have a direct bearing on the health of the community.

Lastly we have inspected the many private wells which are used by a large number of our people for drinking water supplies and have made bacteriological examinations of some of these. This factor is of great importance at all times.

Summary of Results.

Inspection of Dairy Farms. A total of 80 dairies have been inspected yielding in round numbers 3000 gallons of milk daily and drawn from 1200 cows. All milk utensils, and methods of handling were inspected and instruction given when necessary. The number, name and age of employees on the various dairy farms have been recorded, the histories of previous typhoid fever attacks and their protection against smallpox and typhoid fever by vaccination.

Inspection of Hotels, Restaurants and Boarding houses In order that our restaurants, hotels, or boarding houses may furnish good wholesome, pure food several things are necessary. In the first place they must purchase good food which can be regulated only by food inspection. In the second place they must preserve the food against spoiling which so often results in ptomaine poisoning. In the third place the food must be handled by clean employees.

Perhaps the most important point affecting the public health in this classification of food establishments is the health of the employees. Diseased employees are rarely discernible by the patrons particularly if they work in the kitchen. There should be a regular examination of eating house employees.

The toilet facilities which are provided are of a serious consideration and wash bowls with soap and clean towels should be conveniently located to the closets.

In all places the general hygienic conditions have been observed and recommendations made, where necessary, to improve the conditions.

Inspection of Groceries, Meat Markets and Bakeries. In the inspection of the groceries and meat markets, and bakeries special attention has been given to their general hygienic condition, the cleanliness of

the work shops or sale rooms, the garbage and refuse disposal arrangements and the results of the efforts being made to keep out flies. Record has been made of the kind of quantity of food open either inside or outside to the dust and flies. Particularly is this of importance on the outside where fruit and vegetables were found on display at many places not only open to dust and flies but within the reach of dogs and squirrels.

The cleanliness of the employees is of large importance and a record has been made of their appearances and the histories of previous attacks of typhoid fever. The toilet facilities which are provided for them have been inspected and recommendations made for improvements where necessary. It is important that not only shall a clean closet be provided but that a wash bowl and clean towels shall be conveniently located. This furnishes a measure of protection against possible typhoid carriers.

Results of Outside Survey. Most important among the unsanitary conditions which were studied are the privy vaults. With their accumulations of human excrement, in the majority of cases uncovered and unsterilized, they constitute a direct menace to health because of the flies and vermin which find open house there and which infest our houses. By the direct washing of solids over the ground into unprotected well coverings or by the seepage of polluted waters through the soil layers or through cracks in these strata, the privies form a serious danger in many cases to the purity of our private well supplies.

In the entire city the inspectors have located 808 privies which are in use by households. Of these 118 were on premises where sewer connections had already been made but the privies had not been put out of use. The remainder, 690 privies, were on premises where either sewer connections were not possible or had not been made. Assuming the number of homes in the city as 5600, we find privy vaults in use in approximately one-eighth of the total number.

Classifying these 690 privies further we find that 248 of them cannot be eliminated immediately because in the case of 164 there is neither sewer nor water in the street, in 57 sewer facilities are possible but

the city water is lacking while in 27 remaining water is available but sewer facilities are lacking.

There have been written orders issued directing the owners of 442 premises to connect with the sewer. The privies on the 118 premises where sewer connections now exists have been ordered closed and our re-inspection though not complete has shown these orders well complied with. Also there are about 160 orders for sewer connections in local plumber's hands.

As would perhaps be expected the great majority of the privies are of the crudest type. At but few places was an effort being made to sterilize and deodorize the deposit. Only 15 concrete vaults which prevent seepage into the soil were found out of the total of 808. Classifying the whole number from a strictly sanitary viewpoint concerning the protection from the spread of infection by the several means previously mentioned, only 8 are listed as "good", 127 as "fair" while the remainder 673 are described as "filthy". Of the 248 privies on premises which cannot be connected with the sewer 186 have been ordered cleaned and disinfected to relieve somewhat their present unsanitary condition.

The privy as we have it in our midst has no points of merit to stand on. It is a makeshift and should only be tolerated until a sewer connection can be made. Where a sewer connection is impossible a sanitary privy should be installed or a chemical closet used. These deposits of human excreta must be properly taken care of and if we are to have a clean city the present unsanitary privy vault must go.

There are approximately 200 barns in our city in which either horses or cows are kept. The inspection has shown a total of over 400 horses and 30 cows at these places. The proper storage and disposal of the stable manure is of importance to the whole city.

It is required by city ordinance that manure be hauled away once every two weeks between May first and November first. A regulation by the city board of health requires that it be kept in a closed receptacle at the barn thereby preventing the breeding of flies. The survey has shown that satisfactory covered receptacles were then being used at only 10

places. Over 150 written orders have been issued which require the use of covered receptacles for the manure and in half of these premises were ordered cleaned, the manure having accumulated for longer than two weeks period mentioned in the ordinance. Our reinspection, though not complete, has shown a general compliance with these orders.

On over 600 premises either fowls or domesticated animals are raised. In 500 cases chickens alone are found and these fowls total approximately 13,000. On the remaining premises one or more varieties of fowl, chicken, ducks or geese, or domesticated animals such as hares or guinea pigs are encountered. Several pens of pigs were found on the outskirts and have been ordered removed beyond the city limits.

Any property owner is forbidden by the city ordinance to allow fowls or domesticated animals to run at large in the city to the damage or annoyance of any of its inhabitants. In accordance thereto over 70 written orders were issued directing the cooping of fowls or animals found at large and nearly 40 orders for the cleaning of premises which had become offensive from lack of attention to the proper disposal of the manure.

Construction Privies. In the course of the survey 22 construction privies were located and written orders were served on the contractors to put them into sanitary condition. On excavation in the street oftentimes the privy can be placed over a manhole, but if this is impossible portable chemical closets should be used. On building construction portable chemical closets are very satisfactory but a sanitary privy can be made by the use of a galvanized iron garbage pail which keeps the deposit out of the ground. Dry earth and lime should be added and the cover kept on the pail when not in use. When full the can can be removed outside the city and the contents buried.

Examination of Private Wells. As a part of the survey all private wells have been located and information obtained concerning the extent of their usage, their character whether open well or a drive well, their depth and the general protection against surface contamination. Over 560 have been found of which 357 are classified as open wells and 203 as drive wells. The estimated population using

these supplies for drinking water is 4500, approximately 15 percent of the people.

191 bacteriological examinations have been made which have shown over 70 per cent of the wells sampled to be unsafe for use. These reports are based on the total bacterial count and the presence of the colon group. Fortunately the typhoid bacillus does not always accompany the colon germ but these supplies should be regarded as unsafe and should not be used without boiling.

These results show us the necessity for obtaining a pure city supply which can be sold to the people without warning them to boil it and which can replace these suspicious well supplies.

Recommendations.

As a result of this health survey and of my experience as Health Officer I would respectfully recommend the following:

1. The revision of the Milk Ordinance to require:—

A.—That only pasteurized or grade A. certified milk can be sold in the city.

B.—That milk licenses can be granted only with the approval of the Health Officer.

C.—That a milk distributor must obtain the consent of the Health Officer before taking on a new producer.

D.—That the milk distributors shall submit monthly reports to the Health Officer showing the names of their producers.

E.—That milk producers and distributors shall communicate instantly to the Health Officer of Ann Arbor the existence of a case of contagious disease among their employes or in their own household or in the households of the employes.

F.—That all milk delivered to houses under quarantine shall be in fiber containers which cannot be used again.

2. The revision of the Nuisance Ordinance as follows:—

A.—The revision and amendment of Section 6 to provide for:—

1.—The prohibiting of cess-pools.

2.—The prohibiting of privies within sewered districts.

(This would remedy a conflict between the sewer ordinance and this Section 6.)

3.—The requirement that all premises which cannot obtain a sewer

connection shall install either a chemical closet or a dry earth closet or such type of sanitary closet as the Health Officer shall approve.

B.—The addition of a new Section to regulate the construction and maintenance of toilet arrangements on construction work, to provide for:

1.—On street excavation work the placing of the privy building over a sanitary sewer manhole or the use of a portable chemical closet outfit or such other arrangement as the Health Officer shall approve.

2.—On building construction the use of chemical closets, dry earth privies or such type of closets as the Health Officer shall approve.

C.—The revision of Section 7 which relates to the care of stables and to the removing of manure every two weeks from May first to November first, which shall provide:—

1.—That manure shall be kept in closed receptacles between times of removal.

3.—The passing of an ordinance to regulate food establishments, to provide for:—

A.—Special power of inspection of groceries, meat markets, bakeries, restaurants, hotels, boarding houses, confectioneries and fruit stands to be in the hands of the Health Officer or his agents.

B.—Physical and Medical Examination of employes by the Health Officer.

C.—Standardization of the weight of bread loaves and requiring all bread sold to be covered with sanitary wrappers.

D.—The display of fruits or vegetables on the outside of stores or on vendor's carts or wagons only if screened and above the reach of dogs or other animals.

4.—The passing of an ordinance regulating the sale of bottled waters or bottled soft drinks in the city, to provide:—

A.—That bottles shall be thoroughly washed and sterilized before re-using.

B.—That these products shall conform to a standard of purity fixed by the Health Officer.

C.—That no bottles shall be removed from a household where there is contagious disease without the consent of the Health Officer.

I most earnestly urge the adoption of these recommendations which are made with a view of strengthening

our health ordinances and regulations. It should be our aim to make the health conditions in Ann Arbor the very best in our state since they affect directly the health of over seven thousand students. Should the reputation of our university suffer from poor health conditions in the city it would react on all the citizens.

To properly carry into effect the present city ordinances relating to public health and those revisions and new ordinances herein recommended it is imperative that better health organizations should be provided. The experiences of other cities have shown the wisdom of employing a full time health officer to devote his entire time to the protection of the city's health without the interference of the practice of medicine. Sufficient help and means of transportation should be provided to make possible a stringent inspection in all directions.

Respectfully submitted,

JOHN A. WESSINGER

Health Officer.

Reports were received from City Treasurer, Clerk and Acting Marshal for month of October; from Water Works Dept., for quarter ending Oct. 31, 1916; from City Engineer relative to expenditures in his Dept., during Sept., and report of attendance at convention. Also report of Health Officer, relative to health survey, which was referred to the Ordinance and Sanitary committees, and ordered printed in minutes.

The City Engineer recommended that a Kuhlman sewer cleaning machine be purchased.

Moved by Ald. Geo. Lutz, that Council recommends to the Board of Public Works the purchase of a Kuhlman sewer cleaning machine, at a price not to exceed \$106.00.

Adopted by the following vote: Yeas, Ald. Fiegel, Heusel, Lutz, Mayer, Heck, Andres, Flynn, Donnelly, Sherk, Freeman, Sink, Geo. Lutz, 12. Nays, none.

Grading Boundary and Order of Assessment.

By Ald. Sink—Resolved, that the grading on Edward st., within the City of Ann Arbor, heretofore ordered, in the opinion of the Common Council is and is hereby deemed and declared to be a necessary public improvement.

Resolved, further, that all the lands, tenements and premises hereinafter mentioned are deemed and

declared to be benefitted by grading heretofore ordered and it is hereby ordered and determined that all the costs of the said public improvement, street intersections and twenty per cent of the balance of the cost of said public improvement excepted, shall be and is hereby ordered to be levied on and assessed against the lands, tenements and premises situated in the special district assessment hereinafter designated and the said special assessment district is hereby fixed as follows, to-wit:

All those certain pieces and parcels of land situated in the City of Ann Arbor, County of Washtenaw, State of Michigan, as follows:

D. Hiscock's Second addition—

Block 1, lots 5, 8, 9 and 10.

Block 2, lots 16, 17, 18, 19, and the west 50 ft. of lot 1.

Block 3, and lots 3, 4, 5 and 6.

Resolved, further, that and this Common Council hereby requires and orders the sum of sixteen hundred dollars (\$1,600.00) payable in one payment, to be raised by tax and a special assessment on and against the lots, parts of lots, lands, tenements, aforesaid and situated in the said special assessment district, and as a tax against the owners thereof. All to be assessed on and against said lands, tenements and premises according to the benefits coming to each parcel thereof from such local public improvement, and the City Assessor is hereby required to levy and assess the said sum of money as aforesaid on and against the lands and tenements aforesaid on and upon the special assessment roll for the grading district aforesaid and on and upon each and every of the regular assessment rolls of the City of Ann Arbor for the year and during which any such special assessment may be payable, until the whole of such special assessment shall be paid in full, all to be assessed in the manner and for the purpose

aforesaid pursuant to law.

Resolved, further, that the sum of four hundred dollars (\$400.00) is hereby appropriated for the purpose of defraying twenty per cent of the costs of said public improvement; all of which sum of money be and the same is hereby ordered and required to be levied, spread and assessed on and upon each and every of the regular annual assessment rolls of the City of Ann Arbor, and on and against all the taxable property within the said city in an during the period in which any part of this appropriation and assessment is or shall be payable.

Resolved, further, that the City Clerk do certify this determination and order of assessments to the City Assessor pursuant to law.

Adopted by the following vote: Yeas, Ald. Fiegel, Heusel, Lutz, Mayer, Heck, Andres, Flynn, Donnelly, Sherk, Freeman, S'nk, Geo. Lutz, 12. Nays, none.

City Attorney DeVine reported that he had prepared the resolution for a special election as ordered by Council at last meeting.

Moved by Ald. Freeman, that the chair call a special meeting of Council to consider the Health Officer's report, and the resolution to submit to electors the proposition of raising \$75,000.00 for the purpose of laying additional mains for water works, and to take such action as the Council deem best.

Adopted by the following vote: Yeas, Ald. Fiegel, Heusel, Lutz, Mayer, Heck, Andres, Flynn, Donnelly, Sherk, Freeman, Sink, Geo. Lutz, 12. Nays, none.

The City Attorney called attention to various election laws and fully explained the necessary qualifications of electors for the election on Nov. 7.

The Council adjourned.

ISAAC G. REYNOLDS,

City Clerk.
