From Board of Public Works.
To the Board of Public Works, Ann
Arbor, Mich.

Gentlemen: I present the lowing report of the cost of construction of the North State street sterm sewer, from the Huron river to Huron street. This sewer was built by city force account, under the direction of Mr. A. J. street commissioner, and your city The direct superintendengineer. ence of the work was under the direction of Mr. Paul, who had charge of all labor and construction details. Engineering and the purchase of material was done by the engineering department. Work was started in January and completed about April 1. Below is an itemized statement of the cost:

Labor, \$5,347.38; material and supplies, \$8,949.80; telephone bills, \$1.93; repairs on cross walks, \$126.86; M. C. bridge inspector, \$80.78; superintendence by street commissioner, \$464.00; engineering, \$298.67; total cost, \$15,269.42.

It will be of interest to note that the contractors' bid for this sewer was \$33,934.90, the engineers' estimate was \$20,380.57, and the total

cost of construction was \$15,269.42, which shows a saving to the city of \$18,665.48 over what the cost would have been if the work had been let by contract, and \$5,111.15 less than the engineers' estimate, which shows that the work could have been done for the estimated cost and the contractor make a fair profit.

Respectfully submitted, GEO. H. SANDENBURGH,

City Engineer.

Approved by Board of Public Works July 20, 1921, and referred to Council.
